Did you see this in the StRAP?

Research Area 4: Technical Support

The Technical Support research area will provide a means for rapid response to specific, unplanned program office, state, tribe, and community research needs concerning high-priority issues. This may include site-specific analytical and technical support for addressing and resolving sudden issues such as lead, per- and poly-fluorinated alkyl substance, or cyanotoxin contamination in drinking water. This research area will also provide base funding for the annual maintenance and training for widely used EPA models including the Stormwater Management Model (SWMM), the National Storm Water Calculator (SWC), and EPANET. This research area will also provide base funding for EPA's Annual Drinking Water Workshop for Small Systems held in collaboration with ASDWA.

Program, regional, state, and/or tribal needs:

- States and EPA's regions and program offices need resources to rapidly respond to emerging issues in the water sector. This research area will not be involved with immediate response to emergencies in the purview of EPA's National Homeland Security Research Center, but may be able to support follow-up actions (e.g., post-emergency monitoring/analytical support).
- Statutes and/or regulatory issues that the research will support: SDWA, including the National Primary/Secondary Drinking Water Regulatory process; CWA, and NPDES requirements.
- How this research will be applied by EPA Programs/Regions, states, tribes, and/or other customers, to improve human health and the environment: This research area will directly aid states, tribes, and EPA offices through site-specific applied research results to resolve pressing issues.

Output 1: Technical support to states for water treatment, analytical methods, and risk assessments

Provide timely technical support to states for meeting challenges in drinking water, wastewater, stormwater, and water reuse areas.

Output type: Publicly accessible database listing technical support efforts and case studies that might have wider application across the United States. Central website for current versions of SWMM, SWC, and EPANET.

Hello BCs:

Attached is the SSWR draft STRAP. Please share with your PI's and send any feedback ASAP. Also, do you have any feedback on the other STRAPs?

Thanks,
Regan

Subject: FEDS ONLY: Pre-release of Draft StRAPs for A&E, CSS, HSRP, & SHC - Internal Only

Hello BCs:

Please share the attached draft STRAPs with the PI's in your branches. These are draft – not final – so should not be shared outside ORD. I'll also forward the SSWR and HHRA plans once I get them. If you have any comments, please send to me and Sandhya by Monday Aug 5 so we can send a consolidated list of comments back to Angela.

Thanks,
Regan

Subject: Pre-release of Draft StRAPs for A&E, CSS, HSRP, & SHC - Internal Only

Dear All:

I just received the attached pre-released ORD Draft StRAPs. The SSWR and HHRA plans are not included but I will forward to you as soon as I receive them. As mentioned this morning, please distribute these only within NRMRL and limit communications to within ORD as this is a pre-release before we and our partners receive the IOAA approved first Draft ORD StRAPs for review.

If you have any comments or feedback regarding **major issues** at this point, please send to me (by COB Tuesday, Aug 6th) and I'd be happy to share it but keep in mind we will be receiving the first ORD Draft StRAPS along with the program and regional offices on August 15th for our formal review.

If you have any questions, please do not hesitate to contact me or a NRMRL MI.

Kind Regards,

Angela
